Art Unit: 2875

***Priority***

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119

(a)-(d). The certified copy has been filed in parent Application No. 09/449,835, filed on 11/26/1999.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2875

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,331,064. Although the conflicting claims are not identical, they are not patentably distinct from each other because the pending claims are merely reworded to claim the same structure as the structure claimed in claims 1-19 of U.S. Patent No. 6,331,064..

***Claim Rejections - 35 U.S.C. § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsumoto et al in view of Piejak et al. Matsumoto et al discloses the claimed invention except for the teaching that a lamp tube outside electrode is attached to an adjacent outside electrode of another lamp. It would have been obvious to one skilled in the art at the time invention was made to modify the LCD back-lit assembly as Matsumoto et al to include a plurality of lamp tubes with interconnected outside electrodes in order to efficiently control the display of Matsumoto et al with one source.

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Smallwood et al, Costa, Schmitt, Jr., Kanda et al ('484 and '873), Tagawa, Yoshike et al and Yokokawa et al all disclose LCD assemblies which are similar to applicant's invention.
